

Boilerplate Copy.

PRESS-READY COMPANY DESCRIPTIONS · UPDATED APRIL 2026

01 – ABOUT

Three lengths of Volt Content boilerplate for press releases, media kits, conference programmes, and editorial reference. Use the version that fits your space; longer versions can be edited down rather than padded out. All three are written for direct copy-paste use without modification.

02 – SHORT

~25 WORDS · 185 CHARS

Volt Content is a Copenhagen-based iGaming affiliate network operating localised content sites across 21+ European markets, built on proprietary AI-search infrastructure and structured data.

03 – MEDIUM

~60 WORDS · 430 CHARS

Volt Content is a Copenhagen-based iGaming affiliate network operating localised content sites across 21+ European markets. Founded in 2024, the company is built around a unified technical platform — proprietary AI-search infrastructure, structured data and schema markup on every page, and in-house content tooling — that allows new country sites to launch in weeks rather than months.

04 – LONG

~150 WORDS · 990 CHARS

Volt Content is a Copenhagen-based iGaming affiliate network operating localised content sites across 21+ European markets. Founded in 2024, the company is built around a unified technical platform: proprietary AI-search infrastructure, structured data and schema markup on every page, and in-house content tooling that allows new country sites to launch in weeks rather than months. Volt Content's approach prioritises engineering depth over portfolio breadth — one platform, many markets. The company is led by founder and CEO Daniel Theo, a repeat founder with multiple private equity exits and operating experience across Europe, the United States, Asia, Malta, and Switzerland. Volt Content's portfolio currently includes one international live site, three pre-launch country properties scheduled for Q3 2026, and a roadmap of 17+ regional sites planned through 2027.
