01 – ABOUT VOLT

Volt Content is a Copenhagen-based iGaming affiliate network operating localised content sites across 21+ European markets. Founded in 2024, the company is built around a unified technical platform: proprietary AI-search infrastructure, structured data and schema markup on every page, and in-house content tooling that allows new country sites to launch in weeks rather than months. Volt's approach prioritises engineering depth over portfolio breadth — one platform, many markets.
