03 — PAIRING PRINCIPLES

THREE ROLES

Use serif for emotional/elevated moments, sans for utility, mono for data. Don't blur the lines — each family has one job.

ITALIC SPARINGLY

Reserve serif italic for stylistic emphasis on display text. Avoid using italic in body or UI.

MONO LABELS

All eyebrows, statistics, and numeric data go in DM Mono uppercase with letter-spacing 0.18em. Never set body text in mono.

COLOR HIERARCHY

Use Volt Blue for emphasis and links only. Never apply brand colors to body text.
